DETAILED ACTION

1. This Office Action is in response to the communication filed on October 26, 2001, which paper has been placed of record in the file.
2. Claims 1 and 2 are pending in this application.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1 and 2 are rejected under 35 U.S.C 101 because the claimed invention is directed to non-statutory subject matter, particularly, an abstract idea.

The claims, as presently claimed and best understood were reconsidered in light of the "Examination Guidelines for Computer-Related Inventions" and were found to be non-statutory. Discussion of the analysis of the claims under the guidelines follows.

Claims 1 and 2 merely manipulate an abstract idea that is not within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. ***Claims 1 and 2 are not implemented as process, machine, manufacture, or composition of matter.*** Section 101 of title 35, United States Code, provides: Whoever invents or discovers any new and useful ***process, machine,***

manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Therefore, claims 1 and 2 are non-statutory, because they are directed solely to an abstract idea without practical application in the technological arts.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by ***Oakland Tribune, "Banks offer photo checks to fight fraud."***

Regarding to claim 1, Oakland Tribune discloses photograph on personal bank check (see entire document, Bank of America branches are offering personal checks that feature black and white photographs of the account holder).

Regarding to claim 2, Oakland Tribune discloses prior to this patent submission, there were photographs on personal bank checks (see entire document, Bank of America branches are offering personal checks that feature black and white photographs of the account holder).

Conclusion

7. Claims 1 and 2 are rejected.

8. The prior arts made of record and not relied upon is considered pertinent to applicant's disclosure:

Goldhirsh Group, Inc. discloses photo safety checks that print checks and deposit slips with an identification photo on them.

VARbusiness discloses photo checks.

PrintingNew East discloses photo checks.

American Banker discloses photo checks which carry a digitized photo of the account holder on the face of the check.
